EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Zilka on 9/15/2006 at 408-505-5100.

The application has been amended as follows:

13. A computational device connected to an interconnected network, the computational device including a processor for executing instructions stored on a computer-readable storage medium comprising:

an instruction set for communicating with a license enforcement server associated with an operating system of a network-critical machine, the communication comprising a request for a permission to perform a licensed activity and a return message associated with a status of the permission to perform the licensed activity; and

an instruction set for performing the licensed activity, the computational device selectively performing the licensed activity using the instruction set for performing the licensed activity;

wherein at least one license enforcement gateway is communicatively coupled to the license enforcement server;

wherein a namespace tree uniquely identifies the licensed activity;

Art Unit: 2134

wherein the license enforcement server connects to the license enforcement gateway to synchronize and validate the namespace tree;

wherein an alarm is created if a state of authorization includes an unauthorized state;

wherein;

the license enforcement server periodically confirms the validity of at least one license according to at least one of a date, a number of launches, and a number of logged hours; and

the license enforcement server authorizes licenses without communicating with the license enforcement gateway between the periodic confirmations;

wherein the licensed activity is prevented if the state of authorization includes the unauthorized state.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: As noted by the applicant the prior art fails to disclose the applicant's claim language, wherein the system for authorizing licensed activity specifically comprises a namespace tree used to uniquely identify the licensed activity, such a namespace tree being different from the disclosure of the prior arts database; and, additionally such components as the namespace tree in combination with the outlined structure of the applicant's invention, which comprises a license enforcement server associated with a network critical

machine and a database, and a license enforcement gateway, whereby the validation of a license occurs on the noted conditions within the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Szymanski whose telephone number is 571-272-8574. The examiner can normally be reached on M-F 8-4:30.

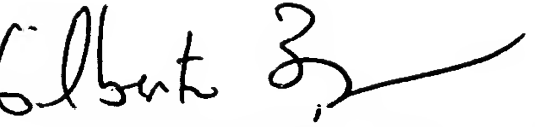

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacques Louis-Jacques can be reached on 571-272-6962. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
